Central Intelligence Agency

Washington, D.C. 20505

The Honorable William E. Brock
The Secretary of Labor
Washington, D.C. 20210

Dear Mr. Secretary:

Transmitted herewith is the Central Intelligence Agency's Annual Occupational Safety and Health Report for Fiscal Year 1986. The report was prepared in consonance with Title 29, Code of Federal Regulations, Part 1960 and the guidelines provided in Occupational Safety and Health Administration publication 2014, Appendix F.

Efforts are continuing toward strengthening the Occupational Safety and Health Program and I feel that considerable progress was made during Fiscal Year 1986. For instance, lost workday injuries/illnesses were reduced from 153 to 134; comprehensive surveys were increased from 51 to 91; two safety officers were employed during the year and there are now two professional safety officers and a fire protection engineer assigned full time to three major components of the Central Intelligence Agency.

Shortfalls continue to be the requirements in Title 29, Code of Federal Regulations, Part 1960 for an annual survey of each facility and the safety and health training of all employees. These areas are being strengthened each year and considerable improvement is expected during FY 1987. In this regard, as reflected in Paragraph 3 of the attached report, efforts are being made to recruit two safety officers, one industrial hygienist and one fire protection engineer for the Safety Division. Training programs are being initiated for supervisors and also for component safety officers overseas.

The Honorable William E. Brock

Please be assured that safe and healthful working environments for CIA employees is a primary concern and our efforts are continuing toward full compliance with the applicable Federal Statutes.

Sincerely,

ILLEGIB

William F. Donnelly
Deputy Director
for
Administration
